Ms. Coffin is one of several branch chiefs for the Nuclear Regulatory Commission's Office of New Reactors, Division of New Reactor Licensing, which was established in October 2006. As branch chief, she is responsible for managing new reactor licensing design certifications, early site permits, and combined license applications for Westinghouse's AP1000 and potentially Mitsubishi's US-APWR.

Ms. Coffin has worked for the NRC in their Rockville, Md. headquarters for the past 10 years, primarily in the technical areas dealing with corrosion of steam generator tubes and embrittlement of PWR reactor vessels. She has also worked extensively in both the rulemaking and license renewal programs.

Prior to her work for the NRC, Coffin worked for Baltimore Gas & Electric at the Calvert Cliffs Nuclear Power Plant in Lusby, Md. She started her engineering career working for the Navy at the David Taylor Research Laboratory in Annapolis, Md.

Ms. Coffin holds a B.S. in materials engineering from Drexel University, and an M.S. in materials science and engineering from Johns Hopkins University.
